

MODEL 781 8" COMMERCIAL TRANSPORT SYSTEM

(Model 781 CTS Customer Terminal shown w/Optional 2-Way Video Housing and 8" Painted Tubing)

- **Overhead Delivery**

The Model 781 Commercial Transport System (CTS) incorporates 8" tubing. Its unique sealing and carrier presentation design achieves a commercial payload capacity of 25 pounds with low impact delivery at both ends.

- **Carrier**

The removable side opening Carrier is constructed of extruded aluminum with internal space for a box of quarters. Carrier is removed from unit using recessed folding handles at each end.

- **Durable Construction**

Model 781 CTS Terminals are constructed of powder coated aluminum and stainless components that provide a lasting and durable appearance.

- **Intelligent Control**

The 781 CTS features simplified controls and operation. The Teller controls are "SEND", "HOME" and "DOOR". The Customer controls are "SEND" and "HOME". Each unit incorporates sensing switches to monitor obstructions in the opening and closing cycles.

- **Versatile Installation**

The compact size of (18" W x 16-1/2" D x 36-3/4" H) for both the Teller and Customer Terminals allows the Teller Terminal to be installed under the counter. Island widths of 30" accommodate installation of the Customer Terminal. In applications that require access for tall vehicles there is an 8" riser available for use with the Customer Terminal.

- **Listings**

UL classified as to electrical, fire, shock and casualty hazards only in accordance with standard UL60950-1.
