

Add Two-way Video at Any Location

The Video Add-ons and Complete Audio-Video Customer Stations Provide the Right Features for Any Drive-up or Walk-up Application.

Model 1522
 Complete Drive-up Audio Video Station
 Everything is inside one housing – connects directly to Series 1500 video hub.

Model 1523
 Lane Video Add-on
 Requires external Lane Station (1520) for audio functionality.

Model 1524
 Lane Video Add-on
 Includes internal Lane Station (1520) for connection to external speaker and mic.

Model 1525
 Complete Audio Video Station with Handset
 Ideal for indoor walk-up kiosk locations.

Personal and accurate communication is enhanced by a clear visual connection. Using Audio Authority's variety of Series 1500 customer stations, you can easily add on two-way video and audio capability to existing drive-ups, or even a walk-up lobby customer station. All four customer video station models are equipped with a motorized camera and are easy to install and service via a secure hinged door.
